

# Cyber Security Course Outline

Intro to Cyber Security & Forms of Attacks

---

## About:

*Course Length: 1.5-2 hours*

Cyber security is imperative to all businesses and organizations. In particular, small businesses are vulnerable to cyber attacks due to easier access and lower security. Learn more about the different types of cyber attacks and how you can protect your confidential information in our cyber security course. Every organization should have an understanding of cyber security and its importance in day to day business.

## Offered Platforms:

- Webinar via Google Meet
- In person (workplace or scheduled area)

## Requirements:

- Computer, phone, or tablet **if selecting webinar** as your platform

**NOTE:** If selecting webinar as chosen platform, all meetings are recorded for your reference.
